

Method for extracting nitrocresols from waste water produced in the manufacture of mononitrotoluene and use of said extract

Abstract

5

The invention provides a process for removing nitrocresols from wastewater of mononitrotoluene preparation, which comprises acidifying the alkaline wastewater of mononitrotoluene preparation with acids to a pH of at most 3 and treating the nitrocresols with an extractant.

10

The invention further provides the preparation of dinitrotoluene by use of the nitrocresol-containing extracts as a feedstock.
